Program Summary:

The formal program consisted of seven invited paper sessions,

Bayesian Inference
Inference
Biostatistics
Time Series
Quality and Reliability
Experimental Design
Modelling and Data Analysis

three contributed paper sessions, a panel discussion on

The Future of Statistics in Industry and Government

and a banquet speech. The twenty-three distinguished speakers at the invited paper sessions all gave first rate presentations incorporating their latest findings within the framework of recent major advances in the area. Complete details on the titles are given on the enclosed program.

Over 140 persons attended the conference. Attendance at all of the sessions was very good. One particularly gratifying feature was the number of intensive informal discussions that were generated from the talks. Throughout the period of the conference, there was a very active exchange of technical information going on among small groups of participants.

The support of Air Force Office of Scientific Research, Army Research Office, Office of Naval Research, and National Science Foundation were gratefully acknowledged at the conference. No proceedings are planned.
